TEAM HANDICAP TOTAL _____

Please list players full handicaps as listed on their GHIN card. The Tournament Committee will adjust a teams handicap total by limiting the team members to a maximum of an 8 stroke difference between players. The adjustment is calculated from the lower handicap team member. Example: if Player One's handicap index is 10.0 and Player Two's handicap is 24.3. The teams handicap is calculated by adjusting Player Two's handicap to a maximum of 8 strokes higher than Player One, in this example that is 18. This Team's combined handicap, when adjusted, should be 10 + 18 = 28 total.

Please mark "Yes" if player is a current Neshobe GC member: Player 1 _____ Player 2 _____
